Changes in ~~strike through~~ are previously proposed deletions to the existing sections of Title 23, Division 3, Chapter 2, Article 24 of the California Code of Regulations that were identified in the draft emergency regulation released on July 23, 2021.

Changes in underline are previously proposed additions to proposed sections of Title 23, Division 3, Chapter 2, Article 24 of the California Code of Regulations that were identified in the draft emergency regulation released on July 23, 2021.

Changes in ~~red double strike through~~ are new deletions made since the draft emergency regulation was released on July 23, 2021.

Changes in red double underline are new additions made since the draft emergency regulation was released on July 23, 2021.

On page 1, modify the title of section 876.1 as follows:

§ 876.1 Emergency Curtailments Due to Lack of Water Availability in the Sacramento-~~San~~ Joaquin Delta Watershed

On page 1, modify section 876.1, subdivisions (a) through (c) as follows:

- (a) This section applies to ~~direct water~~ diversions and diversions to storage, of natural and abandoned flows, in the Delta Watershed as defined in section 877.1.
- (b) After the effective date of this regulation, when flows are determined to be insufficient to support all diversions, the Deputy Director as defined in section 877.1 may issue curtailment orders as defined in section 877.1 to water right holders and claimants in the Delta Watershed in order of water right priority, requiring the curtailment of water diversion under designated water rights and claims, except as provided in sections 878, 878.1, and 878.2. Before issuing curtailment orders to water right holders and claimants in the Legal Delta, the Deputy Director will consult with and obtain the concurrence of the Delta Watermaster.

**08/03/2021 BOARD MEETING – ITEM #5
CHANGE SHEET #1 (CIRCULATED 07/30/2021)**

(c) Initial orders requiring curtailment or reporting ~~as defined in section 877.1~~ will be mailed to each water right holder, claimant, or the agent of record on file with the State Water Board, Division of Water Rights within the Delta watershed. The initial orders will require reporting in accordance with section 879, subdivision (d)(1) and will either require curtailment or will instruct water right holders or claimants regarding procedures for potential future curtailments. The water right holder, claimant, or agent of record is responsible for immediately providing notice of the orders to all diverters exercising the water right or claim covered by the orders. Communications regarding changes in water availability, including notification of when curtailments of water diversions are required and when curtailments are temporarily suspended or reimposed, will be provided by email to the State Water Board's Delta Drought email distribution list and by posting on the State Water Board's drought webpage. Notice provided by email and by posting on the State Water Board's drought webpage shall be sufficient for all purposes related to required curtailments and reporting pursuant to this section and section 879.

On pages 2 and 3, add section 876.1, subdivision (d)(5), and renumber section 876.1, subdivisions (d)(5) and (d)(6) as follows:

(5) Relevant available information regarding stream system disconnection where curtailing diversions would not make water available to serve senior downstream water rights or claims, including seasonal or temporary disconnections.

~~(5)(6)~~ The Deputy Director may also consider any other pertinent, reliable, and publicly available information when determining water right priorities, water availability, water supply projections, and demand projections.

~~(6)(7)~~ Evaluation of available water supplies against demands may be performed using the Water Unavailability Methodology for the Delta Watershed, or comparable tools. The Water Unavailability Methodology for the Delta Watershed is described in the Water Unavailability Methodology for the Delta Watershed report dated July 23, 2021, which is hereby incorporated by reference. Evaluation of available supplies against demands may be performed at the Hydrologic Unit Code level 4 Sacramento and Hydrologic Unit Code level 4 San Joaquin River watershed scale, or at the subwatershed scale. Subwatersheds within the Delta Watershed are defined in the July 23, 2021 Water Unavailability Methodology for the Delta Watershed summary report and were established based on Hydrologic Unit Code level 8 watersheds.

On page 3, modify section 876.1, subdivision (e) as follows:

(e) Upon receipt of an initial order pursuant to this section, a water right holder or claimant may submit information to the Deputy Director to: support a proposed correction to the water right priority date of the right for which the order was issued; or propose that curtailment may not be appropriate for a particular diverter or in a specific stream system as demonstrated by verifiable circumstances, such as a system that has been adjudicated or is disconnected and curtailment would not make water available to serve senior downstream water rights or claims. Any such propos~~ed priority date correction~~ and all supporting information and analysis shall be submitted to the Deputy Director within 14 days of receipt of the initial order. Proposals~~for priority date corrections~~ , supporting information, and analyses submitted more than 14 days after receipt of an initial order may be considered to support corrections in advance of future curtailments. The Deputy Director will review timely-provided proposals and supporting information and analyses as soon as practicable, make a determination regarding the ~~proposal~~~~appropriate water right priority date~~ , and inform the affected water right holder or claimant of any appropriate update ~~to the priority date used~~ for purposes of water diversion curtailment orders. Before making any determinations ~~regarding proposed corrections to the priority date of water right holders or claimants who divert~~ within the Legal Delta, the Deputy Director will consult with the Delta Watermaster.

On pages 3 and 4, modify section 876.1, subdivision (g) as follows:

(g) The Deputy Director ~~will may~~ temporarily suspend curtailments for some diverters, in order of water right priority, when water availability increases or is projected to increase due to precipitation and runoff events ~~or due to reductions in demand, and the Deputy Director determines that such increased water availability warrants a suspension~~ . The Deputy Director will consider the best available information, such as water supply forecasts from the California Department of Water Resources and other similarly reliable sources, to determine the geographic scope and duration of suspension. By no later than October 1, 2021, and by no more than every 30 days thereafter, t~~The Deputy Director will promptly consider reliable and publicly available information that supports suspension, extension of suspension, or reimposition of curtailments of water diversions, and will publicly issue an update explaining any decisions resulting from the consideration of that information.~~

On pages 11 and 12, modify section 878.2 as follows:

Water users may propose alternatives to water diversion curtailment that achieve the purposes of the curtailment process described under section 876.1 by submitting a proposal to the Deputy Director. Proposals must describe the setting, the parties, the actions, ~~the provisions for monitoring, record keeping and reporting,~~ and the purported benefits of the proposal in sufficient detail to demonstrate to the satisfaction of the Deputy Director that implementing the proposal will not injure non-party legal users of water or result in an unreasonable impact on fish and wildlife. In considering a proposal under this section, the Deputy Director may ~~request additional information or~~ consult with other entities that may have technical or legal information that should be considered in evaluating such proposals, including but not limited to the California Department of Water Resources (~~DWR~~) and United States Bureau of Reclamation (~~Reclamation~~). The Deputy Director will consult with the Delta Watermaster on any proposals among diverters within the Legal Delta. ~~A proposal may be implemented pending review by the Deputy Director provided that potentially affected water right holders and claimants, including but not limited to DWR and Reclamation, concur with the proposal and no objections to the proposal are submitted to the Deputy Director.~~ The Deputy Director may approve a proposal subject to conditions, including record keeping and reporting requirements, ~~and provided that the Deputy Director finds implementing the proposal will not injure non-party legal users of water or result in an unreasonable impact on fish and wildlife.~~ Diversions consistent with a proposal ~~implemented or~~ approved pursuant to this section are subject to this article, and violations of the terms of the ~~approved~~ proposal shall be subject to enforcement as a violation of this article or as an unauthorized diversion or use of water.
